Cheatography Cheat Sheet
by Dave Child (DaveChild) via cheatography.com/1/cs/1002/

📄 Plain Text Block

This is an example of a plain text block, filled with example content. Text in these blocks is added as-is, including
line breaks.

</> Code Block

```
<?php
  // This is a code block.
  // It preserves indentation and
  // uses a monospaced font.
```

▥ One Column Block

This is a one-column block.

It's useful for listing long items.

It can also be useful for sequences of steps or commands in programming cheat sheets or recipes.

Rows have alternating background colours to make the cheat sheet easier to read.

▥ Two Column Block

Block Type:	Two Columns
Useful For:	Translations
	Key / Value Pairs
	Lists of small items

Multi-Column Items

If you have an item in column 1 but not column 2, it will span both columns.

▥ Three Column Block

1	1	2
3	5	8
13	21	34
55		

These blocks are great for saving space when using lists of small items.

Also, this is the first example of a "content note", which appears under a content block.

▥ Four Column Block

A	B	C	D
E	F	G	H
I	J	K	L
M	N	O	P
Q	R	S	T
U	V	W	X
Y	Z		

Much like the three column block, the four column block is handy for saving space when using lists of small items.

? Question and Answer Block

What is this?

A Q&A block displays each question with the answer indented underneath.

When is it useful?

It's great for question and answer content!

📊 Bar Chart Block

Red		12
Green		24
Orange		88
Blue		50

The bar chart block takes labels and numbers and generates a chart like the above.

🖼 Image Block

The image block is just an image, displayed in a block. In the live version of a cheat sheet (not the PDF) you can click on an image for full size.

▦ Video Block

Video: http://youtu.be/3ZqPaohVjmw

Video can be pulled in from YouTube or Vimeo, and will be shown on the website but not on the PDFs.

📅 Live Content Block

Label	Value
Year	2015
Month	3
Day	5

A "live content" block pulls its content from a URL, in a specific format. It's great for anything that changes regularly, like live statistics, up-to-the-minute sports results and tables, stock and share prices, TV schedules and even traffic and weather reports.

✔ Icons

{{fa-rocket}}	🚀	{{fa-bold}}	**B**
{{fa-check}}	✔	{{fa-leaf}}	🍃
{{fa-square-o}}	☐	{{fa-cut}}	✂

Check out the full list of Font Awesome icons!

Icons work in block titles as well as content. There is a cheat sheet for Font Awesome icons at

http://www.cheatography.com/davechild/cheat-sheets/font-awesome/

B Formatting Options

Italics (*example*)	*text*
Bold (**example**)	**text**
Superscript (example)	^text^
Strikethrough (~~example~~)	~~text~~
Inline Code (`code`)	`code`
Asterisk (*)	*
Carat (^)	\^

Sometimes you want to use a "*" or "^" in your content. Add a backslash before those characters (as an escape character) to tell Cheatography to treat them as normal text instead of special formatting characters, like this: * \^

☰ Special Content

	Insert non-breaking space
{{noshy}}	Do not insert shy hyphens
{{nobreak}}	Do not break long lines (only in list blocks)
{{literal}}	Do not format text

⬈ Links

{{popup="http://..."}}	Popup URL provided
{{popup="http://..."}}link text{{/popup}}	
{{link="http://..."}}	Link to URL provided
{{link="http://..."}}link text{{/link}}	

☰ Borders and Alignment

{{ac}}	Align text centrally
{{ar}}	Align text right
{{bb}}	Add border at bottom
{{br}}	Add border on right
{{bl}}	Add border on left
{{bt}}	Add border at top

📢 Publishing

You can only publish a cheat sheet once.

Before that, only you can see it, unless you share the "preview" URL.

Newly published cheat sheets are prominent on Cheatography, so make the most of publishing and wait until you're happy with the cheat sheet!

You can still edit a cheat sheet after you've published it.

You can't unpublish a cheat sheet once it's been published.

🈯 Language Support

Cheatography supports all languages, as best we can manage.

This means that the web versions of cheat sheets support all of the languages we've seen so far, including Chinese and Japanese.

We're working on right-to-left language support.

▥ Columns

Blocks are organised into columns by you.

PDFs organise blocks into columns automatically.

Try to keep the columns roughly even in length - it makes the cheat sheets easier to use online.

☆ Tips

Use **tags** - they help people find your cheat sheet!

Pick a **dark colour** - it makes your cheat sheet easier to read.

Write a good **description** so people know what's on your cheat sheet.

Tell people about it when you're finished!
